

Limited Lifetime Warranty on Log Elements

Moosehead Cedar Log Homes (henceforth referred to as MCLH) extends to the original purchaser a Lifetime Warranty on all wood components produced by MCLH. Should any log element or any other material produced by Moosehead Cedar Log Homes become structurally defective, MCLH will at its option, repair or replace (FOB - MCLH Factory) any material deemed defective by MCLH. Moosehead Cedar Log Homes shall not be responsible for any warranty claims associated with storage, handling, maintenance or construction practices which do not comply with MCLH's specifications, blueprints or construction manual.

This warranty does not cover any defects resulting from improper maintenance or the lack of Rain Gutters.

The log material must be treated with a good quality wood preservative within (90) days of construction and thereafter at recommended intervals, or this warranty is void. Proper maintenance records are the responsibility of the homeowner.

Other items you may have purchased in the log home package such as windows, doors, gasket, hardware and the like are covered by expressed warranties of the specific manufacturers. These items are not manufactured by MCLH and Moosehead Cedar Log Homes does not warranty such items.

All claims must be presented in writing describing the exact nature of the defect.
